DETAILED ACTION

Claim Objections

1. Claim 21 is objected to because of the following informalities: In line 7 replace "links" with –sinks- and 'receiving device" with –receiving unit-

. Appropriate correction is required.

Drawings

2. Drawings are objected to because in Figs 5 and 7 "SEIZE" needs to be replaced with –SIZE-. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over US patent No.6,052,386 (Achilleoudis).

Regarding claim 21 Achilleoudis discloses a system comprising an ATM network (Network in Fig 2 supports ATM services) in which a sending unit (Sending unit 17 in Fig 2, col 3 line 7) and a receiving unit(Receiving unit 29 in Fig. 2, col 3 line 19) are connected over a respective link, said sending unit comprising means for multiplexing frames from user data sources into a user data stream (Frame assembly means 19 in Fig. 2), said receiving unit receiving the user data stream from said ATM network, said user data stream comprising mini frames (col 4 lines 39-41, Fig. 4) which belong to connections that are to be terminated to user data sinks connected to the receiving unit (links connected to data sinks 40, 42 and 44 in Fig. 2) wherein said receiving unit comprises first cell framer reading device (frame disassembler 31 in Fig. 2, col 3 line 20).

Achilleoudis did not specifically disclose said telephone system being mobile system, as in claim 21.

Art Unit: 2661

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to use the system disclosed by Achilleoudis in a mobile system in order to have a transfer of mobile voice and data frames in ATM format over wireless links

The motivation to do so is to provide a mobile system wherein the amount of wasted bandwidth is greatly reduced because the amount of unused space in transmission is also reduced.

Regarding claim 22, wherein said sending unit comprises a second cell header device (frame disassemble 37 in Fig. 2, page 4 line 7).

Allowable Subject Matter

5. Claims 18-20 are allowed.

Claims 23-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claim.

Conclusion

6. The allowability of claims is hereby withdrawn due to new art developed.
